

## Policy for Accepting Roads

New London Township requires that all roads included in new plats must be asphalted and meet all Kandiyohi County requirements and specifications before being accepted by the town board.

Upon completion of the road, the developer must provide a formal request to the town board before the road can be considered for acceptance.

If the developer failed to provide a formal request and/or the road was not immediately accepted following completion, it becomes the responsibility of the property owners to petition the board to accept the road.

Before the board will consider accepting the road, the property owners must have the road inspected and, if deemed necessary, bring the road up to county required specifications.

The board does **not** have to accept any road.

Adopted this 27th day of September, 2018.

BY THE TOWN BOARD

*Mark Mertens*

Town Chairperson

Attest:

*Nancy Hammerschmidt*

Town Clerk
